

Supercharge your SAP data

Transition to a modern, scalable and real-time data integration solution to unleash the power of your SAP data

As the most secure, end-to-end real-time data integration solution, Fivetran automates high volume SAP data movement with minimal impact on transactional systems and near-zero latency to various cloud-based platforms. This simplified, easy-to-use solution enables teams to spend minimal effort building and managing data pipelines and more time improving business decisions.

Key benefits

- 

Easy implementation, robust security and privacy features, and simple solution to lower TCO and increase ROI
- 

Drives revenue and user engagement by combining SAP data with external sources
- 

Deeper insights and decisions at scale with continuous, real-time SAP data integration into cloud-based platforms

Supported cloud destinations
